Currently a recent graduate, I am seeking a long-term position as a mobile/web engineer starting in September 2024.

### Front-End Developer & Lead Mobile Developer

LeHibou

Internship

Maintainer and lead developer of the mobile application in **React Native** using **Expo**, **Maestro**, testing with **Jest**, **MSW**, including full deployment on the iOS and Android stores. Agile environment applying the SCRUM methodology. Team development of the web application in **NuxtJs**.

Feb. 2024 - Aug. 2024    Grand Baie, Maurice

### Data Analyst

Spliit

Internship

Development of a **Google Apps Script** tool using Excel as an advanced tool. Database analysis with **Google Data Studio** using **PostgreSQL**. Testing and team development of a web application in **ReactJs**. Lead developer of an automated data collection tool.

Sept. 2022 - Feb. 2023    Paris, France

## Projects

Some of my projects are available to view on my GitHub.

### Studeam

EPITA Project

Mobile application for collaborative work and organization of group work sessions. Developed in **React Native** with a **Java Spring Boot** back-end. One-year project with deliverables and presentations. Group project involving 4 team members.

### LivLink

EPITA Project

Kotlin Android application for telephony and communication aimed at isolated individuals. Back-end in **Java Spring Boot**. One-year client project in agile organization evaluated through presentations and deliverables.

### SudoSumo

Personal Project

Web application in **ReactJs** / **Typescript** for Sudoku with a hand-implemented solver using human solving techniques.

Play now at : <https://louis78.github.io/sudosumo/>

### Fevly

Personal Project

Mobile application for event management using **Flutter** / **Dart** on Android and iOS. Group project of 2 members.
